# Finishing Touches

For a finished look and smooth transitions to adjoining flooring surfaces, Armstrong offers a complete selection of coordinated trims and moldings in all species and colors.

### T-MOLDING

Fills the gap at doorways, and finishes spaces between the two areas of laminate flooring.

### STAIR NOSE

Used where laminate flooring meets a step down or landing, or great for staircases.

### QUARTER ROUND

The classic finish to your laminate floor, used where wall and flooring meet.

### MULTI-PURPOSE REDUCER/THRESHOLD

Provides a smooth transition from your laminate floor to another type of flooring at a lower height. Also, finishes the space where laminate flooring ends against a vertical surface and where a quarter round cannot be used such as, sliding glass doors, against cabinet toe kicks, or carpet.

### FLUSH STAIR NOSE

The durability of Armstrong's laminate flooring makes a great choice for staircases.

## Aluminum Molding

- Full assortment of ADA-compliant trims and moldings
- All colors can be used with any floor
- Provides enhanced durability
- The 3-in-1 trim contains the reducer and threshold add on components, therefore any of the 3 profiles can be obtained; track is included with the 3-in-1 bundle (see page 82 for details)

### ALUMINUM TRANSITIONS

### REDUCER

Provides a smooth transition from your laminate floor to another flooring at a lower height.

### THRESHOLD

Finishes the space where laminate flooring ends such as, sliding glass doors, wall bases, door thresholds and carpet.

### T-MOLDING

Fills the gap at doorways and finishes spaces between the two areas of laminate flooring.

# Installation

## Lock&Fold®

Lock&Fold® technology is the industry’s fastest and easiest installation system. No angling of the short end and then the long end – simply lock and fold. Reduced installation time means you can enjoy your new floor sooner with less interruption to your home.

## Underlayment

Armstrong has engineered a line of underlayments to be used when installing laminate floors. The use of quality underlayment is critical to a successful installation and should be installed prior to laying planks. Use the pre-applied tape for a seamless moisture barrier, especially over concrete. These underlayments can also be used with any floating floor installation.
