## Features

With its luxurious long-plank format and embossed-in-register surface texture, Grand Summit truly looks like genuine solid wood flooring. Beautiful in every respect, this product offers beveled edges on all four sides to elegantly define each plank. And the planks are enhanced by their detailed surface embossing, which replicates the subtle scraping found in the finest hardwood. With all these refined characteristics, the installed Grand Summit floor is sophisticated and stylish.

But this beauty doesn't just look good ... it works hard. Offering an ultra-durable Microscratch Protect finish and anti-bacterial coating, Grand Summit is suitable for heavy domestic and light commercial use.

## Suggested Underlayment | Maintenance

- **SLFOA – Foam**
