

Laminate

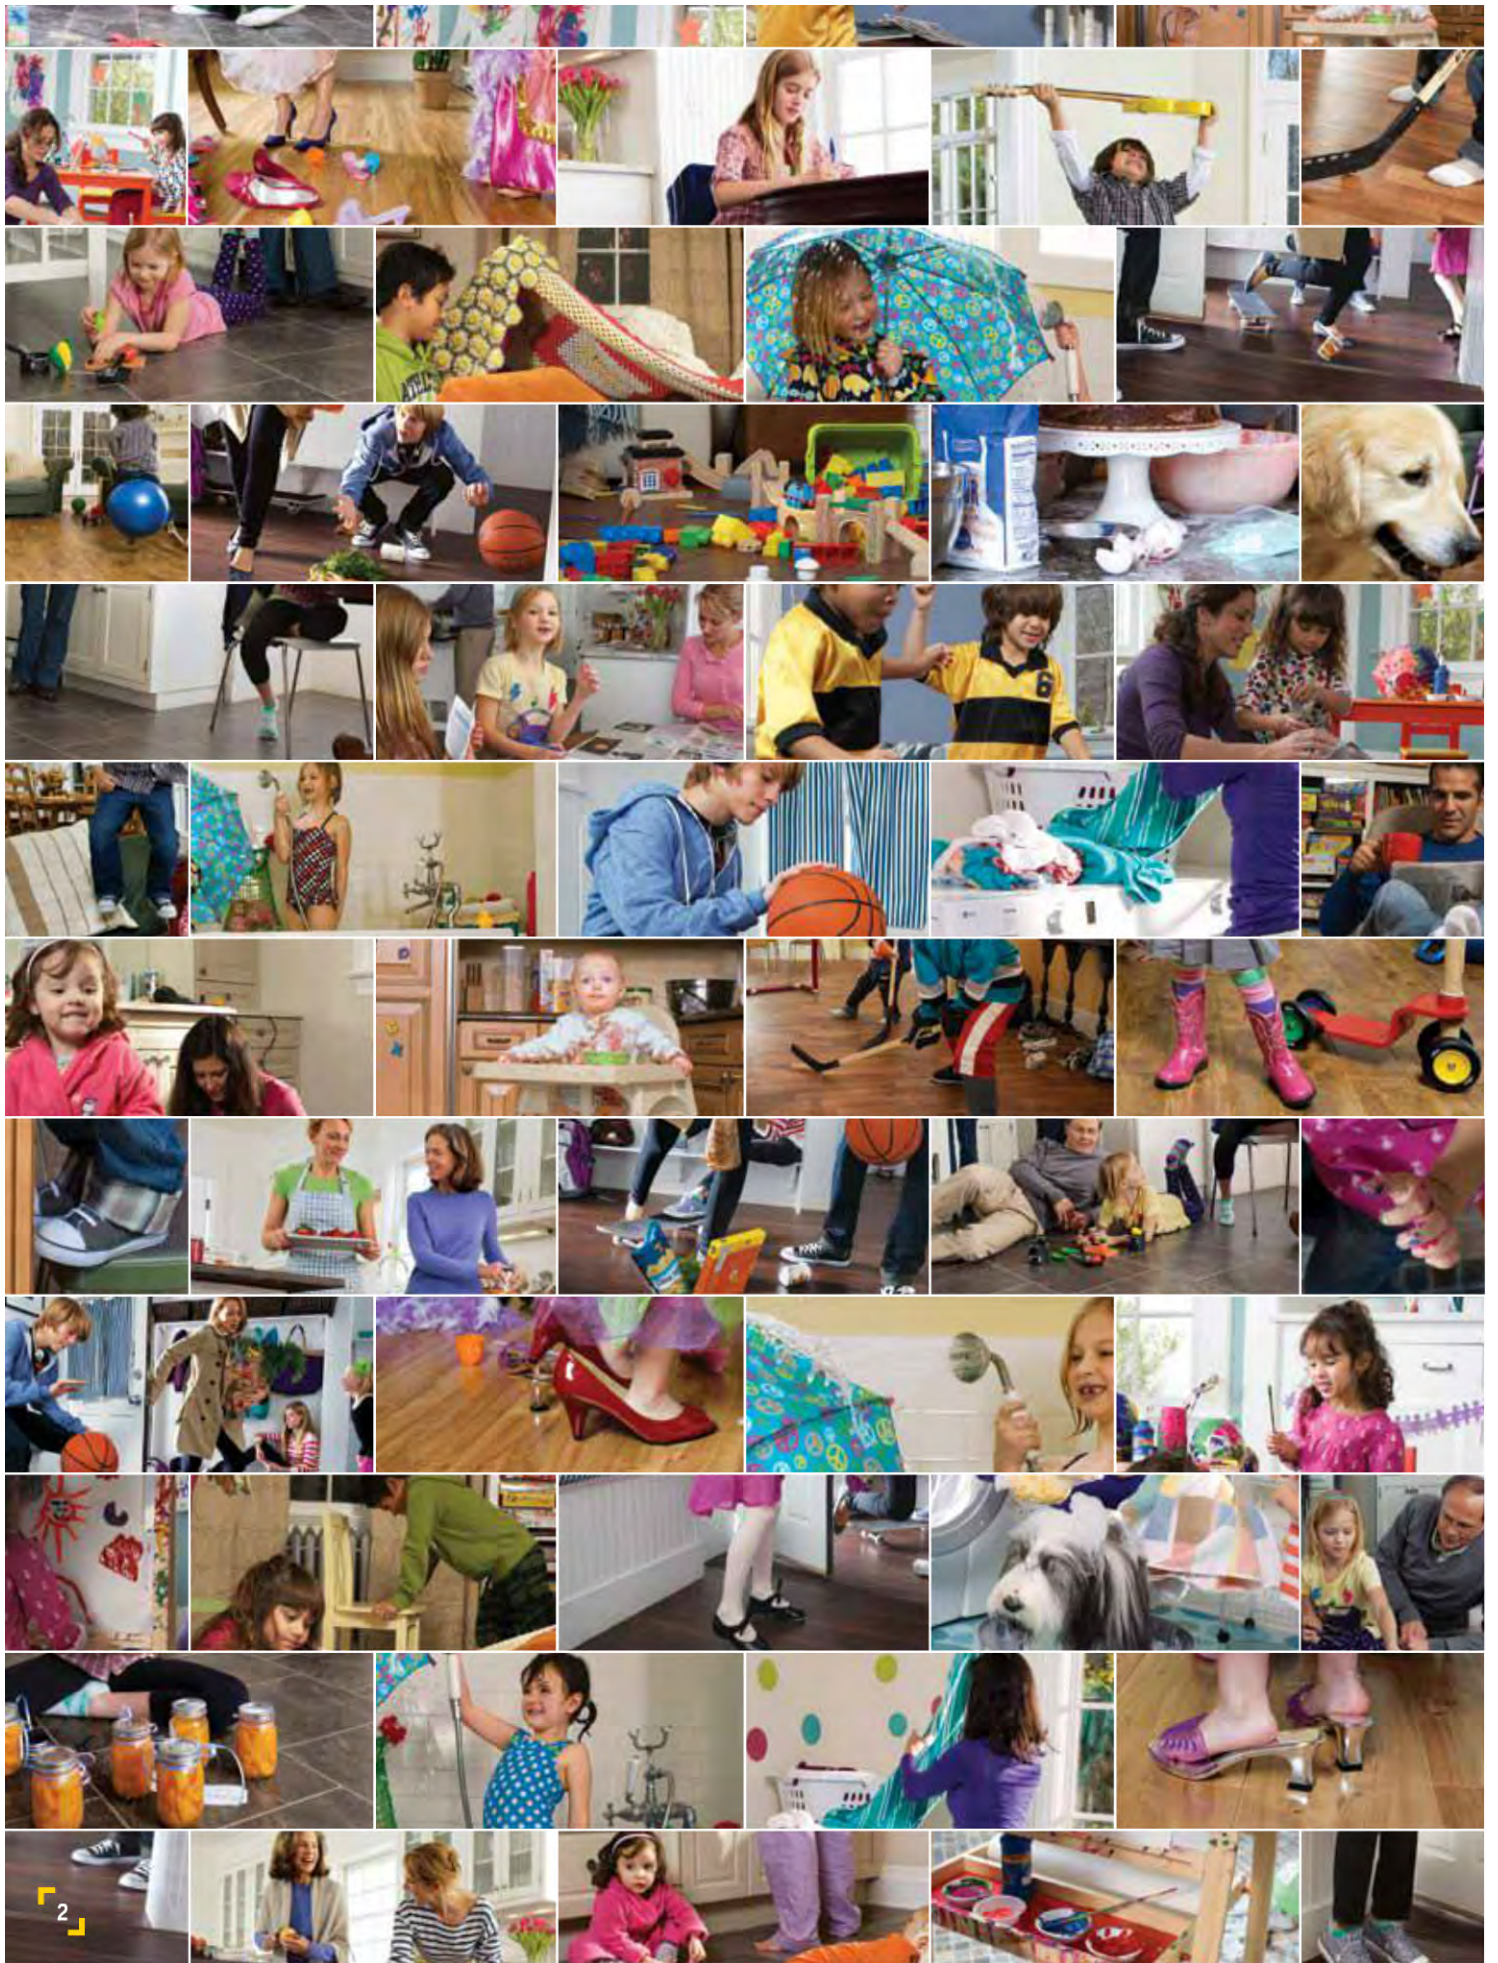

THE ULTIMATE  
FLOORING EXPERIENCE

Journeys™  
New Frontiers™  
Cross Country™  
Trends™

Love the day-to-day.

Welcome to everyday. That wonderful series of day-to-day moments strung together where real life happens. And like you, we believe everyday doesn't have to be ho-hum or boring. Everyday doesn't have to compromise. Or apologize because it's not prom day or wedding day. Everyday takes joy in just being tea-party-Tuesday. Or let's play dress-up day. At Tarkett® we love the day-to-day. And, in honor of the everyday wear, tear and daily parade of pets and little people, we created **Tarkett Laminate** flooring. So, go ahead. Celebrate the sounds of giggling little girls. Let them play with pots and pans. Enjoy your everyday. Knowing we're right there with you.

## Everyday jumping-playing-laughing-living in high-heeled princess shoes made possible by Tarkett® life-resistant laminate floors.

Standing up to the adventures and magical moments that make up the day-to-day requires, among other things, extremely well-made, highly durable floors.

### Americore™ hardwood board

Most laminate makers settle for softer woods. Not Tarkett®.

We have the only 100 percent hardwood core in the industry, with superior indentation resistance to handle everyday dents and dings.\*

### AC4 commercial-rated wear layer

Our AC4 commercial-rated wear layer provides 60 percent greater wear resistance than typical laminates with an AC3-rated wear layer, and protects against fading and staining.\*

### AC3 light commercial-rated wear layer

This rating means that your floor is engineered to resist stains or fading, and weather the day-to-day wear and tear as well or better than other laminates out there.

### IC3 indentation resistance

Industry testing simulates the effect of dropping items on the floor, much like a baby hurling a bottle in a tantrum, only more forcefully. Our laminate earned an industry-leading rating, certifying it can withstand wear and tear at the highest level without denting.

### FloorScore™ certified

On average, we spend 90 percent of our time indoors. Tarkett wants to help make your indoor day-to-day healthier for you and your family.

You might be surprised to learn that over 20 percent of households include someone with allergies and/or asthma. Many items in the home can emit volatile organic compounds (VOCs) that can aggravate symptoms of these illnesses. When you choose a product with the FloorScore™ certification seal, you are assured it has passed a third-party (Scientific Certification Systems) process that certifies it contributes to good indoor air quality. FloorScore certification means that the product helps lower the risk for certain health problems like headaches, dizziness and allergic reactions. Cleaner Air = Healthier Air = Healthier People.

### Made in the USA\*

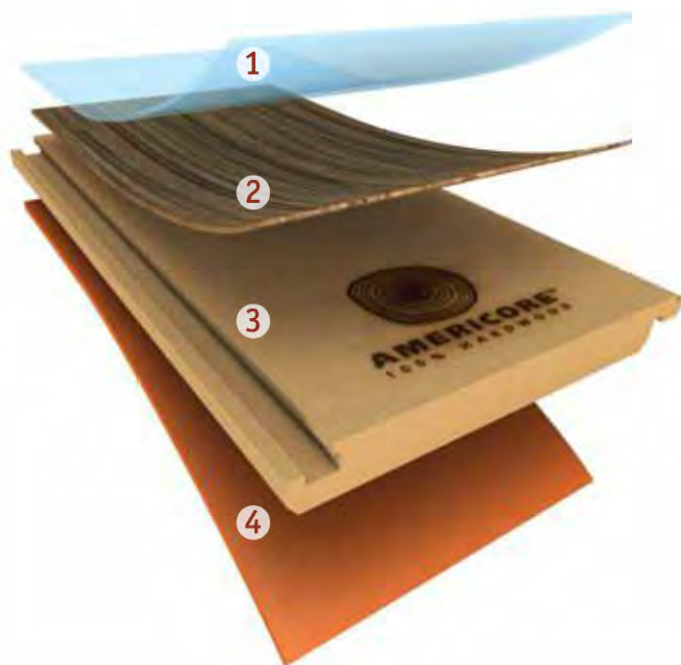

Most of our floors are made in America by Americans. And we can all be proud of that fact.

## Four solid reasons to make Tarkett® Laminate part of your day-to-day.

1. AC4 commercial-rated wear layer\*
  - Provides 60 percent greater wear resistance than typical laminates with an AC3-rated wear layer and protects against fading and staining
2. Design layer
  - Enhances texture to replicate the beauty of natural wood grains
3. Americore™ hardwood board\*
  - Provides superior indentation resistance with the only 100 percent hardwood core in the industry
4. Balancer layer
  - Keeps planks level for added stability and uniformity

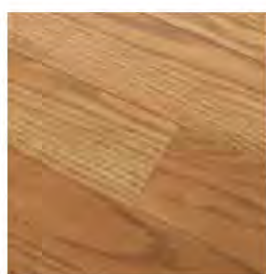

## The Journeys™ Collection

Premium performance comes in a traditional classic, Aberdeen Oak, made all the more elegant with beautifully embossed 4" planks and beveled edges. Explore the possibilities, ranging from the fresh, inviting look of Light Oak to the richer, deeper tones of Warm Gunstock or Chocolate.

## The New Frontiers™ Collection

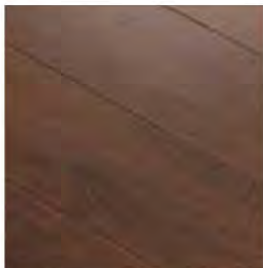

New Frontiers™ reflects the character and colors of the North, South and West regions, with an accent on less saturated, subtropical woods. Strikingly realistic embossing recreates the authenticity of American Ash, the weathered look of Antique Stained, and a blend of Oak and Hickory in Teak.

## Tarkett® Color-Coordinated Moldings

**T-Molding**  
(TTM XXXXX)

Ensures a smooth transition between laminate and other flooring on the same level. It can also be used as an expansion joint for laminate flooring (every 40 feet of length and width).

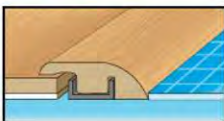

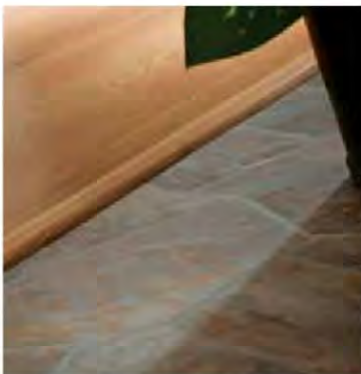

**Stair Nose**  
(TSN XXXXX)

Provides an elegant finish for landings or stairs.

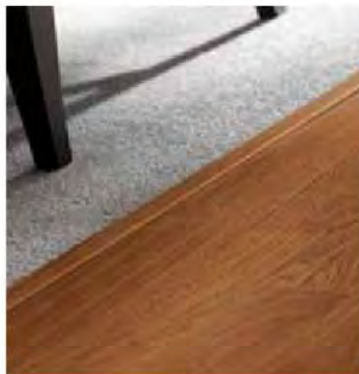

**Quarter Round**  
(TQRXXXXX)

Ensures a perfect finish around walls or baseboards.

**Universal Reducer**  
(TUR XXXXX)

Makes an attractive and safe transition from laminate flooring to other flooring positioned at different heights.

To order the appropriate molding, use the profile prefix (TTM, TSN, TQR or TUR), plus the last five digits of the flooring. For example, TSN00042 is the proper ordering number for the Stair Nose that coordinates with Journeys™ Aberdeen Oak Gunstock.

It's nice to look amazing with so little effort.

## Tarkett® Laminate Care and Maintenance

Tarkett Laminate floors are easy to clean and maintain. For day-to-day maintenance, all you need is a damp mop. For tougher cleanups, we suggest Tarkett SureShine® cleaning solution.

Following are some simple steps that'll help keep your Tarkett Laminate floor looking great:

- Vacuum or sweep up installation debris immediately after installation.
- Use proper rests, glides or casters (preferably wide, smooth, nonstaining, protective load-bearing devices) under furniture to avoid scratches or indentation from frequent movement.  
CAUTION: Casters on portable appliances, dishwashers and microwave carts can cause damage to laminate floors. Use extreme caution when moving these items around on any laminate floor.
- Choose nonstaining mats or area rugs in doorways and entranceways to trap excessive moisture, sand, grit and debris.
- Avoid using rubber-backed mats or rugs.
- Sweep or vacuum regularly to remove loose debris as needed.
- For regular cleaning, dilute a neutral base cleaner, i.e., Tarkett SureShine in warm water, wring out the mop or sponge until damp and mop. Never apply cleaner/water solution directly to the floor.
- Don't use soap- or oil-based cleaning products, i.e., liquid dish cleaners or pine cleaners.
- Don't use abrasive cleaners or pads, i.e., cleanser or nylon pads.
- Don't use protective coating on your laminate floor, for example, wax, polish or urethane coating.
- For tough stains and spills, wipe up promptly with a damp cloth.  
Note: As with any floor, immediate attention to stain removal is of the utmost importance.

How to remove scuffs and stains, if they occur:

- Scuffs and surface marks (rubber heel marks): Apply fantastik® or Direct® multipurpose cleaners directly to stain, let stand for 10-15 seconds and rub with a clean, damp cloth. Some marks may require a small amount of mineral spirits\* applied on a clean cloth.
- Tough household stains (acid, alkali, blood, ketchup, mustard, food dye, fruit juice, rust, urine, excrement): Mix a neutral cleaner with water and apply with a clean cloth, gently rubbing into the stain. You can also treat stubborn stains by mixing a one-to-one concentration of water to liquid bleach, saturating a cloth with that solution, and treating the stain for up to a maximum of one hour. Rinse with clean water applied with a clean, damp cloth.
- Solvent paints and stains (hair dye, iodine, Mercurochrome, nail polish, oil-based paints, wood stains): Remove excess immediately, rub lightly with a clean white cloth soaked in mineral spirits\*.
- Miscellaneous stains (adhesives, asphalt, candle wax, grease, oil, tar): Carefully scrape residue with a putty knife, being careful not to scratch the floor. Rub lightly with a cloth soaked in mineral spirits\*, then use isopropyl alcohol\* on a clean cloth.

\*CAUTION: Mineral spirits and alcohol are flammable solvents. Please follow cautions on container.

## Healthy Indoor Environments

At Tarkett®, we love the day-to-day, so we do our part to make your indoor days healthier. Did you know that, on average, people spend about 90 percent of their time indoors? Or that many household items emit volatile organic compounds (VOCs), which can aggravate asthma and allergy symptoms such as headaches and dizziness? Look for the FloorScore™ certified logo, meaning the flooring has passed rigorous testing for VOCs, so you can be confident that the flooring you buy will contribute to better indoor air quality in your home.

We also love to keep our planet healthy. Fifty years ago, Tarkett started to recycle. Globally, we keep 120 million pounds of material out of landfills every year! And we strive to continuously reduce the carbon footprint of each and every square foot of flooring we sell by using fewer resources, and finding better ways to manufacture and bring our products to market. We want to make sure everyone can continue to love the day-to-day year-after-year.

### Tarkett® Laminate Environmental Facts

#### Reducing Our Footprint

Most Tarkett Laminates are AC4 rated for long wear, meaning they don't have to be replaced as often as other floors (less used flooring in landfills). And 90 percent of the materials used to produce our laminate are sourced from companies 500 miles or less from our plant.

#### Reuse and Recycle

Tarkett Laminate is installed without adhesive and can be easily reinstalled/reused in another room or home. All scrap boards at our plants are used for cabinetry, drawers and packaging.

#### Healthier Homes for Families

Tarkett Laminate is FloorScore certified for healthier indoor air quality. It's hypoallergenic, and easy to clean and maintain without harsh chemicals.

#### Ingredients That Make a Difference

Tarkett Laminate contains more than 80 percent recycled materials. The wood chips used to make our laminate are a byproduct of the lumber and logging industry.
