IDEAS FROM DAL TILE

daltile
DESIGN WITH CONFIDENCE™

A TILE REVOLUTION

GLAZED PORCELAIN TILE ENTERS A NEW ERA OF EXCEPTIONAL PERFORMANCE — WITH PATENT-PENDING OUTSTAND TECHNOLOGY™.

OUTSTAND TECHNOLOGY™

The Many Layers of OutStand Technology

Additional Performance

Tiles with OutStand Technology™ have a high coefficient of friction, preferred for most commercial projects. They are also frost-, chemical-, and stain-resistant.

Technical Performance

OutStand Technology™ provides glazed porcelain tile with unparalleled surface-wear-resistance — perfect for heavy commercial applications.

Antimicrobial Protection

Tiles with OutStand Technology™ are infused with Microban® Antimicrobial Technology, which provides a long lasting, durable layer of protection from stain- and odor-causing bacteria.

Made in the U.S.A.

Some projects or contracts mandate the use of American-made products. Colour Scheme field tiles meet that requirement.

PTCA

Colour Scheme has been certified by the Porcelain Tile Certification Agency.

Recycled Materials

These are one of the first porcelain tiles to contain both pre- and post-consumer recycled material content. They also have one of the highest RMC percentages of any tile in the industry (more than 60.0%).

Creating products containing recycled materials is just one facet of Daltile's commitment to environmental responsibility.

OUTSTAND TECHNOLOGY™

A Commitment to Green Building

Recycled Material Content

Daltile has a company-wide commitment to doing business in an environmentally responsible manner, and OutStand Technology™ is just one example of that commitment.

Tiles with OutStand Technology™ have among the highest recycled material content of any in the industry — more than 60%. They are also one of the first porcelain tiles to incorporate both pre- and post-consumer recycled material.

For more information about how our products can help you earn credits toward a LEED certification for your project, please visit www.daltileproducts.com/LEED or www.daltilegreenworks.com

Made in the U.S.A.

Some projects or contracts mandate the use of American-made products. Colour Scheme field tiles meet that requirement.

Depending on your building site, Colour Scheme with OutStand Technology™ may also help you earn additional points for regional materials, as they are manufactured in our state-of-the-art plant in Muskogee, Oklahoma.

If you need more information or assistance on LEED certification, we have specialists on staff to assist you.

OUTSTAND TECHNOLOGY™

Tougher than your toughest environment.

CRYSTALLINE-SHIELD-LIKE FINISH

High Performance

OutStand's patent-pending glaze technique creates a crystalline-shield-like layer of protection, which will last the life of the tile. That's why tiles manufactured with OutStand Technology™ have superior surface wear resistance, and are perfect for heavy commercial applications.

Microban® Antimicrobial Technology

During the manufacturing process, the glaze is infused with Microban® Antimicrobial Technology, which inhibits the growth of stain- and odor-causing bacteria on the surface of the tile. The result is an additional layer of durable, long lasting protection, keeping the tile cleaner, between cleanings.

CONTINUOUS PROTECTION

Microban Technology is incorporated into the glaze during the manufacturing process, so it starts working the moment the tile is complete. Unlike other antimicrobial agents on the market, Microban doesn't require UV light to be effective. It won't wash off or wear away, giving your design an added level of durable, long lasting protection — and it's perfect for high traffic environments.

BACTERIAL GROWTH ON TILE SURFACE OVER 24-HOUR PERIOD*

WITH MICROBAN® PROTECTION

WITHOUT MICROBAN® PROTECTION

PTCA Certified

Some foreign imports entering the market today claim to be porcelain tile, but do not actually meet the U.S. standards for porcelain — putting you at risk of specifying an inferior product for your project. PTCA protects you by guaranteeing the products you specify are, in fact, porcelain tiles.

*This information is based upon standard laboratory tests and is provided for comparative purposes to substantiate antimicrobial activity for non-public health applications. Microban technology is not designed to replace good building practices or protect users from disease causing microorganisms. Antimicrobial action limited to product surfaces.

Microban Antimicrobial Technology is not designed to replace normal cleaning practices or protect users against foodborne illness. MICROBAN is a registered trademark of Microban Products Company.

*Microban protection makes
Colour Scheme a great fit for use
in education, healthcare, and other
high traffic environments — as well
as residential applications.*

Dynamic C.O.F. (Wet) value as measured by the DCOF AcuTest™ helps to assess a products suitability for a commercial environment. For more information, visit our website at www.daltile.com/DCOF.

TRIM

| | TYPE | NUMBER | SIZE | PCS. PER CARTON |
|---|------------------|-----------|--------|--------------------|
|  | Bullnose | P-43C9 | 3 x 12 | 30 |
|  | Surface Bullnose | P-4669 | 6 x 6 | 44 |
|  | Outcorner | PC-4669 | 6 x 6 | 44 |
|  | Cove Base*■ | P-36C9TB | 6 x 12 | 22 |
|  | Cove Outcorner* | PC-36C9TB | 1 x 6 | 15 |

* Cove Base and Cove Outcorner available in solid colors only, no speckled colors. Cove Base and Cove Outcorner pieces are glazed ceramic and not suitable for exterior application.

■ Cove Base trim is intended to coordinate with floor field tile in the standard 90-degree installation position.

SHADE VARIATION

INSTALLATION

| THICKNESS | GROUT JOINT RECOMMENDATION |
|-----------|----------------------------|
| 5/16" | 3/16" |

DYNAMIC C.O.F. (WET) : 2

1 < .42

2 ≥ .42

The higher the rating, the higher the slip resistance.

STATIC C.O.F. (WET) : 3

1 < .50

2 .50 - .59

3 ≥ .60

NOTES

Use of a latex modified thin-set is recommended for installation.

Since there are variations in all fired ceramic products, the tile and trim supplied for your particular installation may not match these samples. Final color selection should be made from actual tiles and trim and not from tile and trim samples or color reproductions. Manufactured in accordance with ANSI A137.1 standards.

Natural lighting, wall-washed lighting and tile installed at different planes may impact color tonality. For additional information, refer to "Factors to Consider" at <http://daltile.com/factors-to-consider.cm>. Water, oil, grease etc. create slippery conditions. Floor applications with exposure to these conditions require extra caution in product selection. Not for use on ramps.

Glazed porcelain tile enters a new era of exceptional performance.

GLAZED PORCELAIN

By their very design, DalTile products can help make it easier for you to earn LEED™ points and/or points towards many industry leading green home building programs. From using recycled material content to establishing manufacturing facilities within 500 miles of your project, we help ensure you don't have to compromise your design to be environmentally conscious. For detailed information, visit dalTilegreenworks.com.

Microban Antimicrobial Technology is not designed to replace normal cleaning practices or protect users against foodborne illness. MICROBAN is a registered trademark of Microban Products Company.

These certified porcelain products are made in the U.S.A., with 60.8% recycled material content including post-consumer material.
