

# PICASSO HICKORY

## COLLECTION

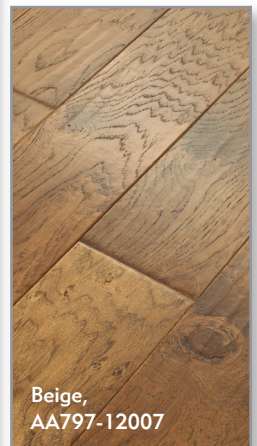

As its name suggests, Picasso is like a work of art. The one-of-a-kind look of Picasso is visually stunning. It features a softer, more refined scrape on a wide and long plank, creating a spectacular impact on any space. Full of natural variation and character, the dynamic play of light and dark edges of this hardwood are achieved by a special hand-staining technique. This produces dazzling depth, clarity and a richness of color that emphasize the beautiful mineral streaks, knots and color variation that make hickory so desirable. Picasso is not simply a backdrop for statement pieces... It is the statement piece!
