## F O R U M

From the great art and sculpture works of Michelangelo to the contemporary musical creations of Gershwin, genius never goes out of style. And today, Mediterranea re-creates nature's genius and delivers the look of classic, vein-cut travertine like never before with its new porcelain tile series, Forum.

Beautiful travertine marbles have been in demand for centuries. Forum utilizes Mediterranea's Dynamic HD Imaging™ design technology to deliver this eternal look like its never been seen before in a porcelain tile product. The Forum series is manufactured in a 12"x24" format that perfectly highlights the rich veining and warm tones of classic Roman Travertine.

Forum is available in two classic designer colors, Silver and Cappuccino, to suit the most elegant tastes. And to further set the series apart, Mediterranea makes Forum available in stunning 12"x24" sheet-mounted mosaic strips as well as in 1"x2" mosaic sheets. The look of Roman Travertine has never been more beautifully reproduced. The Forum series by Mediterranea takes nature's genius to an all-new level.
