

## Congoleum Mouldings & Transitions

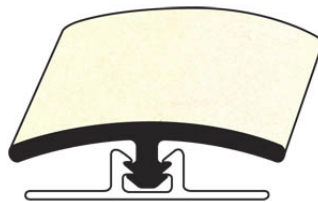

Choosing a styled transition over a metal moulding will help to complete the look of your room. Stylish mouldings contribute an element of polished sophistication to the flooring and provide a completed look to your décor. Congoleum transitions compliment most of Congoleum's products and can be used to transition a Congoleum product and any other flooring type.

## Available Profiles

Coordinating transitions are specially designed to coordinate with all colors.

T-Mouldings should be used between surfaces of equal height.

### **T-Moulding**

Use between floors of equal height

### **Multi-Purpose Reducer**

Use between floors of unequal height

Multi-Purpose Reducer Mouldings should be used between surfaces of unequal height.

Congoleum has a unique offering of transition mouldings that match the most popular DuraCeramic grout colors. This allows you to grout your floor and provide a seamless cross over into another room, or with an ungrouted floor, the moulding color will be an impeccable counterpart to the flooring color tones. For plank products our offering of eight wood colors will provide a wide variety of choice when connecting two wood tones or transitioning from resilient plank to carpet.
